**We are  
waiting for you!**

*CUPB aiming at providing the  
highest quality education to  
produce professionals with an  
international horizon and strong  
competence.*

BEIJING, May 15<sup>th</sup> 2023, Chinese President Xi Jinping recently replied to a letter from Central Asian students at China University of Petroleum, encouraging them to make greater contributions to the promotion of ties between China and Central Asian countries.

In his reply, Xi said that China and Central Asian countries are linked by mountains and rivers, and that they have profound friendships and a shared future. "In 2013, I put forward the initiative of jointly building the Silk Road Economic Belt in Central Asia," Xi said. He noted that over the past decade, China-Central Asia relations have been brought to a new level, and cooperation in various fields has moved onto the fast track, delivering benefits to the peoples.

Friendly relations between China and Central Asian countries need to be carried forward from generation to generation by ambitious and promising young people, Xi said.

Xi said the students have witnessed and benefited from China-Central Asia relations and, more importantly, that they have helped boost China-Central Asia relations. He urged them to take an active part in promoting friendships between China and Central Asian countries, carry forward the Silk Road spirit, tell Chinese stories and Central Asian stories well, act as envoys of friendship and bridges of cooperation, and contribute to building an even closer China-Central Asia community with a shared future.

CUPB actively build an international exchange and cooperation network and platform, advocate and initiate the establishment of the World Energy University Alliance, 31 universities in the energy field from 17 countries on 5 continents participated in it, and were elected as the leader of the university (youth) working group of the “Belt and Road” Energy Partnership Cooperation Network, the world’s first

“Carbon neutrality and climate change-driven Green Transformation” chair, the BRICS Youth Energy Summit and the International Energy Youth Conference were included in the “Beijing Declaration of the 14th Meeting of Leaders of the BRICS Countries”, and selected as Beijing’s first batch of “Belt and Road” National talent training base projects, becoming an active leader in global energy cooperation.

# University

## Overview

CUPB has 3 Academicians of Chinese Academy of Engineering, 2 Academicians of Chinese Academy of Sciences and 1 Academician of Canadian Academy of Engineering

**CUPB** China University of Petroleum, Beijing was founded in 1953, nominated as a key national university in 1960, and is a ‘211’ national universities under administration of the Ministry of Education. As a first-tier national university of China, the mission of CUPB is to prepare qualified engineers and offer great technical service for the global oil industry through its education of the highest quality and excellent research. As a great extension of the Beijing Campus, CUPB

set up a new campus in Karamay, Xinjiang Autonomous Region in Oct. 2015 to uplift its national and international significance. In 2017, CUPB joined the “Double First-rate” strategic plan, which is a new ambitious higher education policy that was officially launched by Chinese Ministry of Education. With years of efforts, CUPB has been working on improving its programme quality, continuously evolving to stay at the cutting edge of research and industrial advances, and broadening its disciplines and research areas.

Among the first batch of ‘The Belt and road National Talents Training Base’ colleges in Beijing

‘211’ national university under administration of the Ministry of Education

# College of International Education

## Introduction

*China University of Petroleum, Beijing has been training international students since 1994. Aiming at cultivating professionals with an international horizon and strong competence, the university has paid effort and made great achievements in improving the quality of education as well as expanding the enrollment of the students in these years. The College of International Education was officially established in 2017 in order to better promote the education for international students as well as international communication and exchange. It takes overall responsibility for the promotion of international education and admission and administration for international students. The College of International Education is a teaching unit engaged in enrollment publicity, teaching management, and student management of international education projects.*

# The Chinese Language Center

## History and Introduction

*Chinese Language Center of CUP was established in 1997 and is mainly responsible for the teaching of Chinese to students in the Chinese language program, undergraduates, masters, PhDs, and short-term exchange students of the College of International Education. According to the specific requirements of each major, the Department of Chinese Language has also set up different types of professional Chinese and scientific Chinese courses, so that students can master the challenging professional vocabulary as soon as possible, thus helping students carry on undergraduate professional learning with ease.*

*The Chinese Language Center is also responsible for organizing Chinese practice projects for foreign students and organizing and guiding foreign students to participate in various Chinese competitions. At present, the group has organized students to participate in a series of competitions such as the "Oriental Cup" Chinese Characters Calligraphy Competition for Foreigners, the "Chinese Star" Competition for Overseas Students in Beijing, and the "Chinese Bridge" Global Chinese Conference for Foreigners; organized and participated in internship activities such as Silk Road Youth Forum and social practice activities of "Feel China -- Green Energy Journey".*

## LANGUAGE PROGRAM

## SHORT TERM PROGRAM

Since its inception, the department is committed to the teaching and research of Chinese as a foreign language. In addition to improving students' daily Chinese applicability and in-depth knowledge of Chinese culture, it also teaches students HSK test-taking skills and improves their passing rate. Till now, about 4000 international students from more than 100 countries have finished their study at the center. There are over 10 full-time professional language teachers with Chinese-teaching qualification in the center. They are all qualified and have been granted the Certificate of Teaching Chinese Language by the Ministry of Education of China. There are 450 lecture hours per semester with full training for listening, speaking, reading and writing.

The language courses include:

Comprehensive Chinese, Grammar, Listening, Oral Chinese, Chinese for Science and Technology, Chinese Calligraphy, shadow-boxing etc.

We also focus on HSK Guidance, after 1 month study most students without Chinese basis can pass HSK 1 or 2, after 1 semester they can pass HSK 2 or 3 and after 2 semesters if they finish whole course they can pass HSK 4 or 5. Our Chinese language students have always attained very proficient levels by the end of their study and this is exhibited through their excellent performance in the various competitions they participate in.

**CUPB**  
Non Degree Programs  
1 Month  
1 Semester  
1 Year  
available

Our exchange and short term programs at CUPB have become popular with the growing internationalization and increasing importance of energy sector professionals world over. Our exchange programs cater for individual exchange students and are flexible enough to adjust to requirements of different groups. We offer Bachelor's and Master's short term programs and exchange programs. These can be 1 semester or 1 year programs depending on the applicants required study time. Otherwise, the exchange programs depend on the existing collaboration with the institution to which the exchange student is affiliated to.

For language short term students we offer even more flexibility with one year and one semester programs. One-month language programs for groups with at least 15 students can be arranged during any semester upon request. Language programs are not only limited to class learning but also include visits to different historical places in and around Beijing for a deeper understanding of Chinese Culture.

Short term programs are the best choice for students looking to experience a different environment, interact and learn from different cultures around the world.

## University Degree Programs

### Bachelor Program:

The Bachelor's program at CUPB is an intensive and yet exciting 4 year study. It is a time for students to learn and choose their career paths. This is the reason why CUPB attaches great importance to this period of study and offers different avenues of learning to students. We have in class learning, practicals and fieldwork. Undergraduate programs are offered in both Chinese and English languages.

Our popular undergraduate programs include Petroleum Engineering, Chemical Engineering, International Trade and Economics, Oil and Gas Storage and Transportation, Computer Science and etc.

### Master Program:

CUPB is the leading institution for energy related studies in China. Master's degree study at CUPB is a period of doing large amounts of research. In class learning is kept at a minimum with students required to obtain about 30-36 credits and devote most of their time to their research, simulations, experiments in labs and academic conferences.

The ultimate goal of the master's program is to build the students research skills and create professionals that are able to solve the different challenges in their industries.

### Ph.D Program:

Ph.D students are expected to come up with original work before they graduate. Therefore, Ph.D students must be able to work in a very high demanding and high pressure environment as this is a period of intense learning and innovation. Our Ph.D program requires students that are prepared to work hard.

Ph.D students are required to publish academic papers in internationally recognized journals before they graduate. Ph.D study at CUPB is intensive but a rewarding choice and chance for all that accomplish it.

### Petroleum Engineering

Well-experienced lecturers come from international first-class petroleum universities, such as Stanford University, UT Austin. The employment rates of our graduates who major in Petroleum Engineering (MEng), Drilling Engineering (MSc), and Reservoir Engineering (MSc) are 93.5%, 98.15% and 97.44% respectively.

### Petroleum Geoscience

This program includes Petroleum System Analysis, Principle of Sedimentology, Basin Analysis, Petroleum Geochemistry, Structural Geology, Seismic Sedimentology, and Reservoir Geophysics.

### Chemical Engineering

Most of the courses focus on the necessary of Petroleum Chemical Engineering, such as Petroleum Chemistry, Chemical Reaction Engineering, Transport Phenomena and Advanced Chemical Engineering Thermodynamics. The primary mission of this program is to educate graduate students and to create fundamental knowledge, pioneering technologies and international perspective in the chemical sciences and engineering. To further the pursuit of excellence, the program aims to foster an intellectually vibrant, collegial atmosphere with a keen appreciation for the value of diversity among students, staff, and faculty.

**Petroleum and Natural Gas Engineering, Geological Resources and Geological Engineering Discipline was assessed as A<sup>+</sup> by Chinese Ministry of Education in the fourth round of Discipline Assessment**

**The Center for World University Rankings 2017  
by Subject Petroleum Engineering  
at 1st Place of the World Ranking**

**1** Based in the College of Geosciences, the International Master's Program in Petroleum Geosciences has enjoyed unparalleled advantages for years. Aiming at cultivating graduates with an international perspective and creative thinking as well as professional knowledge, this Program of the College of Geosciences invites leading professors and experts domestic and abroad to give courses to the students, and all of these courses are taught in English.

**2** In the context of the global petroleum industry, Petroleum Engineering Master Program in English offers students an international study platform in virtue of professors from world first-class universities and the corresponding resources. Students in this program will be well equipped with international competitiveness after a three-year English dominated cultivation.

**3** Energy Finance and Energy System Analysis Program was founded by Academy of Chinese Energy Strategy, the International Master Program in Energy Finance and Energy System Analysis features a cross-discipline research field based on two first-level disciplines: Management Science and Engineering, and Applied Economics, with second-level disciplines including Finance and Industrial Economics.

**4** With geophysical skills required by oil and gas exploration disciplines students in the Master's Program of Geophysics could be well prepared to embark upon either an industrial career or an academic one after graduation. The courses are all given by distinguished professors from world leading universities, which could bring students to the academic frontier and greatly help with the improvement of international prospects.

**5** The International Master Program in Chemical Engineering is based in the College of Chemical Engineering, one of the best in petroleum refining in China. Most of the courses focus on the necessity of petroleum chemical engineering. The primary mission of this program is to educate graduate students and to create fundamental knowledge, pioneering technologies and international perspective in the chemical sciences and engineering.

## Graduate Popular Programs

**Aliyeva Gunay  
Ph.D Student of Geology**

CUPB gives students very good opportunities for getting knowledge from various resources online and in classes. The university invites specialized professors from different countries of the world. Every professor has his own way of teaching, but generally they train students by assigning them projects in groups and preparations for presentations in class. This helps build our ability to work in teams, be more creative, read a lot of scientific articles and get the information for research work. Geologists need to go for field trips, so every professor takes us at least one time at the end of course. This is necessary for every student, because they enable us to transform theoretical knowledge into practical applications.

Also, CUPB has good laboratories with hi-tech equipment which promotes advanced research in Petroleum. Not forgetting the significant conferences, seminars and career fairs organized by the College of International Education of CUPB. This is focused on enhancing the professional growth of students. I am very glad to be a Ph.D student in China University of Petroleum, Beijing.

# Online Application Procedure

## Application Requirements

### Required qualifications for applicants

#### 1. Non-Chinese citizens, in good health:

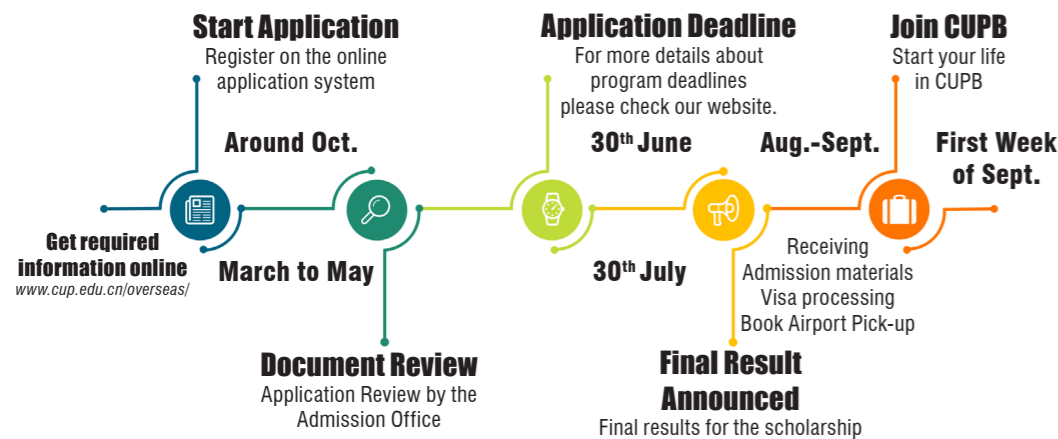

Applicants should be non-Chinese citizens with a valid passport or verification of a foreign nationality at least 4 years, and with over 2 years living aboard records (9 months in a year living aboard can be considered as 1 year which is subject to the entry & exit stamps) in recent 4 years (before April 30th of every academic year)

#### 2. Education and age requirements:

- Those applying for undergraduate study must be high school graduates with excellent grades, and not more than 25 years old;
- Those who are to study at master's level must have a bachelor's degree with good grades and be under the age of 35;
- Those who are to study at doctoral level must have a master's degree and be under the age of 40.

## Application Timeline

### Important Dates, Deadlines and Application Procedure

### Note:

#### Admission Materials should be submitted as follows:

- Non degree applicants (No.1,2,3,7)
  - Bachelor program applicants (No.1,2,3,5,6,7)
  - Master and Ph.d program applicants (No.1-8)
- Please check the detail in next form.

## Application Materials

- Certified highest diploma, and transcript **with an average of over 70%**(should be notarized by related organizations)
  - Copy of Passport, and soft copy of your passport photo with white background, photo size 480x720
  - Application form or CSC form (for applicants who are also applying for the CSC scholarship)
  - Two recommendation letters
  - Study and research plan
  - English or HSK Proficiency Certificates
  - Physical Examination report (Health Certificate)
  - Acceptance letter from your supervisor (For postgraduate applicants only, not mandatory but advisable)
- The students who under 18 years old need to find a guardian for their period of study in Beijing before they begin their studies, this person must be a resident of Beijing. They also need to provide the guardian document (should be notarized by the China Embassy in their own country)

**Please note** that while we are happy to receive your documents about applying to our university, all applications to our university are processed through our online application system (<https://cie-registration.cup.edu.cn>). Please register and submit your documents through the online application system.

The applications are reviewed regularly according to a timetable set by the admission office, and we will issue a Pre-admission notice if they meet the requirements of admission to our university. All applicants should be patient and wait for your application to be reviewed. This is because the applications also need to be sent to the department for double checking. When the department gets to your application you will receive a notification from the system through your email.

**The admission notice** will be issued two weeks after the publication of the admission results. According to the information submitted by applicants while applying through the online system, we'll deliver the letter of admission, or the applicants can come to our office and claim by themselves if they are in China.

**About scholarship**, the final award of the Chinese Government Scholarship is decided by the China Scholarship Council and the admission office shall notify the students at such a time (normally around 15th-30th of July) when they receive the final award notice from the China scholarship council. Otherwise, the other kinds of scholarship (such as university scholarship) normally will be announced before 15th of July.

## Language Requirements: Undergraduate Program

- HSK4 (with a score of 222) or higher level for Chinese taught programs;
- IELTS 6.0 or TOEFL 75 points or more for non native speakers of English choosing English taught programs.

## Graduate Program

- HSK5 or higher level;
- IELTS 6.5 or TOEFL 80 points or more for non-native speakers of English choosing English taught programs.

## Application advice

**CSC Scholarship Winner**  
Master of Petroleum and Natural Gas Engineering

I am pleased to hear that I was announced as the winner of CSC scholarship in 2022. It was not an easy journey, sometimes you get nervous in a new environment or having difficulties in lectures. All of these do not matter as long as you put enough effort and keep on trying everything, I am pretty sure things will go on well later.

Before applying to CUPB, it is recommended that you submit the materials strictly according to the requirements we need, check wisely before submitting any materials, provide us more information about yourself and prove to us why we need to accept your application. Applicants should also be well prepared for online interview due to the high application of scholarships. It is always our duty to admit high performing students to our campus, so it will take time for us to decide the results.

# Available Scholarships in China University of Petroleum, Beijing

- Chinese Government Scholarship
- International Chinese Language Teachers Scholarship
- CUPB Scholarship
- Beijing Municipal Foreign Students Scholarship
- Alumni Scholarship

## Current Student Scholarships:

- Chinese Government Scholarship
- Wangtao Scholarship
- Excellent Student Scholarship
- H&K Excellence Scholarship
- Beijing Municipal Foreign Students Scholarship

## The application process for the Chinese Government Scholarship:

There're two ways to apply for Chinese Government Scholarship

1. Apply through the Chinese Embassy/Consulate or Ministry of Education in your country (Recommended method of application )
2. Apply through our university (Our CSC Agency number is 11414)

For applications through the University, you must submit the application to both our university's online application system <https://cie-registration.cup.edu.cn/> and CSC application system.

Please note that CSC applications typically begin in January every year but for more specific application dates please contact the respective institutions (Embassy or Ministry)

## Registration

International students must register at the time specified in the "Admission Notice"

Students who cannot register on time due to special reasons must submit a formal written application asking for late registration of not more than two weeks at least one week before the registration day, otherwise he/she will be regarded as giving up student status automatically.

Self-supporting students should pay 1-year tuition fee on the registration day. Provide six 2-inch white background photos on registration day.

## Visa

International students should hold an ordinary passport with student visa ("X" visa) to come to China

If you are already in China with "Residence Permit", please come to the office to pay the tuition fee and extend your visa 1 month before the expiring date. Students with "X" visa should register at the office within 7 days after entering China, and apply for a "Residence Permit"

at the police station within 30 days. Overstaying one's visa without renewal or failure to process a residence permit for 'X' Visa holders will lead to punishment by the police, for serious violation, the university will cancel your admission.

## Bank Information

The payments can be made online or by bank transfer

PAY TO: CITIUS33

CITIBANK N.A. NEW YORK, U.S.A.

IN FAVOR OF: ABOCCNBJ010

AGRICULTURAL BANK OF CHINA BEIJING BRANCH, BEIJING, P.R.CHINA

BENEFICIARY'S A/C NO.: 11082301040000641

BENEFICIARY'S NAME: CHINA UNIVERSITY OF PETROLEUM-BEIJING

You can make the payments on our online application system.  
<https://cie-registration.cup.edu.cn>

## Partners

CUPB has been to working closely with world-leading energy companies. More than 65% of its research projects are supported by these organizations.

Internationalization is one of the three key strategic priorities of CUPB whose target is to attract scholars from around the world. CUPB currently has collaborative relationships with 120 higher education institutions and academic organizations from 36 countries. We encourage our faculty and students to explore the world and share their capacity with the world through linkages with CUPB's global partner institutions.

## FEES STRUCTURE

Expenses (in RMB) Tuition (includes insurance)

Chinese Language Program: 21000RMB/YEAR

Bachelor's Program: 25000 RMB/YEAR

Master's Program:

29000 RMB/YEAR (Chinese-Taught Programs)

31000 RMB/YEAR (English-Taught Programs)

Ph.D's Program: 36000 RMB/YEAR

Application fee: 400 RMB or \$70

Accommodation:

1200-1500 RMB/Person/Month (Double Room)

2000-2400 RMB/Month (Single Room)

Please indicate your name and "fee items" when you transfer the fee in the bank, and forward your remittance note to us, so that we could confirm the payment and prepare your visa application form. Please note that the application fee is non refundable and cannot be waived.

# Life in CUPB

student Activities

**China University of Petroleum, Beijing has put a lot of effort into providing grounds for students to interact, read and relax during their free time. A lot of effort has been put into providing students with facilities to develop their extra curricular abilities through sports tournaments like football competitions, volleyball competitions, table tennis etc. Field trips for academic purposes are regularly organized to give students deeper understanding of their fields of study. As a way of helping students get acclimated to their new study environment, visits to different places in Beijing are organized periodically and this has proved to be a popular way of fostering multiculturalism and internationalization.**
