

Management Science and Engineering

Program Introduction

Management Science and Engineering (MS&E) is one of the first-level disciplines in the Management field. This discipline forms its knowledge base by combining the theories and methods from the modern management, economics, mathematics, system science and information science. It's characterized by comprehensively applying the related scientific principles and analytical methods into solving the management problems in the society, economy, and enterprises from the perspective of qualitative and quantitative analysis. You will acquire knowledge and problem-solving skills using optimization software and modeling.
