

Instructions for authors

Petroleum Science is the only English-language journal in China covering petroleum science and technology. It is intended for professionals engaged in petroleum science research and technical applications all over the world, as well as the managerial personnel of oil companies. It covers petroleum geology, petroleum geophysics, petroleum engineering, petrochemistry & chemical engineering, petroleum mechanics and economic management. It aims to introduce the latest results in oil industry research in China, to promote cooperation in petroleum science research between China and the rest of the world, and to build a bridge for scientific communication between China and the world.

To help us publish papers of high quality as quickly as possible and to be able to benefit of SpringerLink's OnlineFirst feature guaranteeing speedy publication times, please read the following requirements carefully before submitting a manuscript.

1. The manuscript must be written in English, but a Chinese version can be enclosed with domestic manuscripts in order to help us understand the original meaning correctly when marking up, editing and proofing. If the Chinese manuscript has been submitted to a Chinese-language journal or was already published, please notify us immediately with the full bibliographic citation; in case you have the intention to publish the Chinese manuscript later, please let us know as well as this might affect copyright issues as well as other important issues. *Petroleum Science* strives to publish exclusive, research papers or review papers. The paper must be related to petroleum science and technology. The English manuscript requires accurate wording, and the expressions should be consistent with customary grammar. Try to use simple sentences to ensure clear expression.

2. Authors are requested to send the Chinese and English manuscripts in Microsoft Word format by post to the following address: Editorial Office of *Petroleum Science*, P. O. Box 902, Xueyuan Road No.20, Beijing 100083, China or as an attachment to an E-mail to ps0092@163.com. The subject of the Email should be "contribution".

To help us review your manuscript in time, the e-mail should include a covering letter which should contain the following information:

The discipline from the following list which best describes the manuscript (petroleum geology and geophysics, petroleum engineering, petrochemistry and chemical engineering, petroleum mechanics, petroleum economics and management), the title of the paper and detailed contact information for the author (mailing address,

telephone number and e-mail address).

3. The manuscript should have the following components:

title; name(s) of the author(s); affiliation(s) of the author(s); abstract; key words; main body of text; (acknowledgement;) references;

(a). Title. An accurate and concise title should describe the core content of the paper.

(b). The authors' names use Chinese pinyin form. The family name of the author comes before the given name and all letters are capitalized, for example, ZHANG Xiaoguang, WANG Yan. The number of authors can be one or more. Please indicate the name and e-mail of the corresponding author in a footnote.

(c). Author affiliations. Please provide the affiliation(s) of the author(s) as precisely as possible, such as School of Petroleum Engineering, China University of Petroleum, Beijing 102249, China. The authors' names in different affiliations should be marked superscripts using Arabic numerals.

(d). Abstract. The abstract should summarize the main topics of the paper and provide readers an overview of the scope of the article.. It should contain a short summary of the field of research, objectives, methods, results and conclusions, but it should not contain symbols, illustrations, tables, references, formulas and any undefined abbreviations.

(e). Keywords. 5-10 keywords should be given.

(f). The text of the paper should be divided into sections, each with a heading numbered consecutively using Arabic numerals. Please use the decimal system of headings with no more than three levels. Only the initial word and any proper nouns in a heading are capitalized.

(g). Citations. Cite references in the text by name and year in parentheses..

(h). Reference list. The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes or endnotes as a substitute for a reference list. Reference list entries should be alphabetized by the last names of the first author of each work.

References published in Chinese must be translated into English and labelled "(in Chinese)" or "(in Chinese with English abstract/summary)" at the end of the reference. Please note that references to articles published in Chinese should be limited and be replaced by citations to references in English if available. References to Chinese

articles might lead to less usage and fewer citations of your article.

Examples:

(1) Book:

Borko H and Jones W. *Formation of Subtle Reservoirs in Continental Faulted Basins*.

Beijing : Petroleum Industry Press.1978. 1-19 (in Chinese)

References to books: if possible please cite a specific chapter of the book you make reference to as these references will be resolved by CrossRef. As an example:

Guille V et al. Colloidal macrostructure of crude oil. In: Appell J and Porte G: Trends in Colloid and Interface Science IX; Progress in Colloid and Polymer Science. 1995. 98: 180-183

(2) Journal:

Robert H. Ultramafic rocks. *Geology*. 1990. 27(4): 7-14

Pay attention to the style of author's name: In the reference list, it is full name of the surname + initial of first name and within the text only the surname is used.

Examples are given below:

1) For only one author, the name in the reference list:

Wang D Y.....

the citation in the text:

(Wang, 1990);

2) For two authors, the names in the reference list:

Wang D Y and Zhang X L.....

the citation in the text:

(Wang and Zhang, 1990);

3) For three authors, the names in the reference list:

Wang D Y, Zhang X L and Ren S L.....

For more than three authors, the names in the reference list:

Wang D Y, Zhang X L, Ren S L, et al.....

For three or more than three authors, the citation in the text:

(Wang et al, 1990);

When two or more than two references are cited in the same place, the citations should be separated by semicolon, such as (Wang and Zhang, 1990; Robert et al, 1998). If the citation forms of two references are the same except the year, the citations can be written as (Wang and Zhang, 1990; 1998). But if the citation forms of references are different, the citations should be listed one by one, such as (Wang and Zhang, 1990; Wang, 1998; Wang et al, 2006).

The names of book, article, press and journal must be consistent with the original translation.

4. Quantities and units. Please always use internationally accepted signs and symbols for units, so-called SI units. Chemical compounds should be named according to the systematic rules of the IUPAC or Chemical Abstracts.

5. Abbreviations must be defined the first time they are used and used consistently thereafter..

6. Illustrations. Line drawings should have a minimum resolution of **1200 dpi**. Check that all lines and lettering within the figures are legible at final size and translated into English. All lines should be at least 0.1 mm (0.3 pt) wide. Vector graphics containing fonts must have the fonts embedded in the files.

Halftones (Photographs, drawings, or paintings with fine shading, etc.) should have a minimum resolution of **300 dpi**. If any magnification is used in the photographs, indicate this by using scale bars within the figures themselves.

Please make sure that the size of figures (including plates) does not exceed the size of a printed page.

7. Please keep a copy of the manuscript. The editorial office will give an immediate acknowledgement upon receiving the manuscript and inform the author by e-mail whether the manuscript has been accepted within 90 days. Do not submit the same paper to other journals during this period; in case you decide to withdraw your manuscript submission, you need to inform us immediately.

8. The author takes sole responsibility for the content of the English and Chinese manuscript if also submitted. For the English manuscript, editor has the right to modify on English grammar. However, the editor must ask for author's permission if modifying the paper substantially.

9. *Petroleum Science* is abstracted/indexed in CNKI, Wanfang Data, ChinaInfo, SCIE, CAS, AJ, PA and CSA.

10. Authors are requested to follow the copyright policy of the journal. For details, please refer to the copyright information and the Copyright Transfer Statement at www.springer.com/12182.

11. After print publication, two complimentary copies of the journal will be supplied to the corresponding author. The journal currently imposes no page charges on authors.

If you have any questions, please call the editorial office on 8610-82375872, 8610-82370092 or 8610-89734040, or email to ps0092@163.com.
